

EURO CROSS

EUROPEAN QUALITY AT INDIAN PRICE

EU GMP

Batch to Batch Quality Consistency

Do you know?

Only **2%** Manufacturers
in India are
EU-GMP Certified.

*Reference: <https://pharma-dept.gov.in/pharma-industry-promotion>

Do you *take* **medicine** everyday?

- ★ If yes, your medicine should be of same consistent quality in each dosage, everytime.
- ★ Strict EU-GMP guidelines ensures batch to batch quality Consistency, verifiable by a lab report.
- ★ **Eurocross** is manufactured only at **EU-GMP Certified plants**.

Frequently Audited QMS

Strict quality protocols are followed

Single Batch Manufacturing

Adequate clearance between batches

Why

EuroCross

Controlled Environment Production

Ensures uniformity across production cycles

Global Acceptance

Accepted across all EU nations, governed by (EMA)

How Eurocross is patient friendly

Heart icon

Helps you to **RECOGNISE** the therapy of medicine

Unique

Numbering System
Helps you to **REMEMBER** the medicine and avoid substitution

Track Your Dosage

Helps you to track your dosage & **REPEAT** everyday by writing the start date & ticking the day box after taking medicine

10x10
Tablets

AMLOCROSS

Amlodipine 5mg

MRP : 28.00

Indications

Relieves high blood pressure and chest pain by relaxing blood vessels and improving blood flow.

Mode of Action

AMLODIPINE works as a calcium channel blocker, relaxing vascular smooth muscle by limiting calcium entry, thereby lowering blood pressure and improving circulation.

10x10
Tablets

AMLOCROSS AT

Amlodipine 5mg +
Atenolol 50mg

MRP : 40.00

Indications

Combines a calcium channel blocker and a beta-blocker to treat high blood pressure and angina.

Mode of Action

AMLODIPINE relaxes blood vessels, while **ATENOLOL** slows the heart rate and reduces cardiac output, resulting in an effective reduction in blood pressure.

10x1x10
Tablets

ATORO 10

Atorvastatin 10mg

MRP : 55.00

Indications

Lowers LDL cholesterol and triglycerides, reducing the risk of heart disease and stroke.

Mode of Action

ATORVASTATIN inhibits HMG-CoA reductase, the liver enzyme responsible for cholesterol synthesis, leading to reduced LDL and increased HDL cholesterol.

10x1x10
Tablets

ATORO 20

Atorvastatin 20mg

MRP : 140.00

Indications

Reduces LDL cholesterol and triglycerides to help prevent cardiovascular events like heart attacks and strokes.

Mode of Action

ATORVASTATIN reduces cholesterol synthesis by inhibiting HMG-CoA reductase, decreasing LDL and triglycerides while moderately boosting HDL.

10x15
Tablets

CLOPICROSS A 75

Clopidogrel 75mg + Aspirin 75mg

MRP : 80.00

Indications

Prevents blood clots, reducing the risk of heart attacks and strokes in at-risk patients.

Mode of Action

CLOPIDOGREL inhibits ADP-mediated platelet aggregation, while **ASPIRIN** blocks thromboxane A₂, together reducing clot formation and cardiovascular risk.

10x1x10
Tablets

GLIMCROSS-GPI

Glimepiride 1mg + Pioglitazone 15mg
+ Metformin 500mg

MRP : 150.00

Indications

Controls blood sugar in type 2 diabetes by improving insulin release, sensitivity, and reducing glucose production.

Mode of Action

GLIMEPIRIDE increases insulin secretion, **PIOGLITAZONE** enhances insulin sensitivity, and **METFORMIN** reduces hepatic glucose production.

10x1x10
Tablets

GLIMCROSS-GP2

Glimepiride 2mg + Metformin
500mg +
Pioglitazone 15mg

MRP : 205.00

Indications

A comprehensive treatment for type 2 diabetes, helping regulate blood sugar by enhancing insulin effects and reducing liver glucose production.

Mode of Action

GLIMEPIRIDE promotes insulin release, **PIOGLITAZONE** improves peripheral insulin sensitivity, and **METFORMIN** suppresses liver glucose output.

10x1x15
Tablets

GLIMCROSS M1

Metformin Hydrochloride
Prolonged-release and
Glimepiride Tablets IP

MRP : 125.00

Indications

Combination of Glimepiride and Metformin is effective & safe for the management of type-2 diabetes mellitus. Reduces risk of complications like retinopathy and CAD.

Mode of Action

GLIMEPIRIDE stimulates pancreatic insulin release, while **METFORMIN** decreases hepatic glucose production and enhances insulin action.

10x1x15
Tablets

GLIMCROSS M2

Metformin 500mg +
Glimepiride 2mg

MRP : 170.00

Indications

Works together to manage type 2 diabetes by stimulating insulin production and improving insulin sensitivity.

Mode of Action

GLIMEPIRIDE increases insulin secretion and **METFORMIN** lowers liver glucose production, together improving blood sugar control.

10x10
Tablets

GLIMCROSS TRIO 1

Metformin Hydrochloride (SR)
500mg + Glimepiride 1mg +
Voglibose 0.2mg

MRP : 150.00

Indications

Manages blood sugar in type 2 diabetes by improving insulin sensitivity, reducing glucose production, and slowing carbohydrate absorption.

Mode of Action

GLIMEPIRIDE boosts insulin secretion, **METFORMIN SR** reduces liver glucose synthesis, and **VOGLIBOSE** delays intestinal carbohydrate absorption.

10x1x10
Tablets

LOSACROSS H

Losartan 50mg +
Hydrochlorothiazide 12.5mg

MRP : 98.00

Indications

Combines an angiotensin II receptor blocker and a diuretic to manage high blood pressure effectively.

Mode of Action

LOSARTAN blocks angiotensin II to relax blood vessels, while **HYDROCHLOROTHIAZIDE** eliminates excess salt and water to reduce blood volume.

10x1x15
Tablets

ROSUVO 10

Rosuvastatin Calcium 10mg

MRP : 260.00

Indications

Lowers LDL cholesterol and triglycerides to reduce the risk of heart disease, stroke, and other cardiovascular issues.

Mode of Action

ROSUVASTATIN inhibits HMG-CoA reductase, lowering cholesterol synthesis in the liver and improving lipid profile.

10x1x10
Tablets

SIPGLIP DM 500

Dapagliflozin 10mg + Sitagliptin
100mg + Metformin 500mg

MRP : 210.00

Indications

A triple therapy for type 2 diabetes that enhances insulin release, promotes glucose excretion, and reduces liver glucose production.

Mode of Action

DAPAGLIFLOZIN increases urinary glucose excretion, **SITAGLIPTIN** enhances insulin release and lowers glucagon, and **METFORMIN** reduces hepatic glucose production.

10x1x10
Tablets

TELCROSS-40

Telmisartan 40mg

MRP : 75.71

Indications

Treats high blood pressure by relaxing blood vessels and improving blood flow, reducing the risk of heart disease.

Mode of Action

TELMISARTAN blocks angiotensin II receptors, preventing blood vessel constriction and lowering blood pressure.

10x10
Tablets

TELCROSS H

Telmisartan 40mg +
Hydrochlorothiazide 12.5mg

MRP : 175.00

Indications

Combines an ARB and a diuretic to lower blood pressure, reducing the risk of stroke, heart attack, and kidney problems.

Mode of Action

TELMISARTAN dilates blood vessels by blocking angiotensin II, and **HYDROCHLOROTHIAZIDE** helps lower blood pressure by removing excess fluid and salt.

10x15
Tablets

TELCROSS AM

Telmisartan 40mg +
Amlodipine 5mg

MRP : 145.00

Indications

Combines a calcium channel blocker and an angiotensin receptor blocker to lower blood pressure and protect heart health.

Mode of Action

TELMISARTAN prevents vasoconstriction by blocking angiotensin II, while **AMLODIPINE** relaxes blood vessels, together reducing blood pressure.
